Pittsburgh International Airport
Terminal Modernization Program Facts

What is the Terminal Modernization Program?

The Terminal Modernization Program is a bold plan to transform Pittsburgh International Airport to better serve travelers, reduce costs, meet changing industry needs, and advance the region.

Terminal Project: A new terminal that consolidates landside and airside operations to be built between concourses C and D

Multi-Modal Complex: A new Ground Transportation Center, parking garage, parking lots, and access roadways

Approximate Number of Employees: 100*
**(Airport, PMO, Design Teams & CMs as of November 2019)*

Approximate Cost: $1.1 B

Economic Impact: $1.6 Billion
11,000 Direct & Indirect Jobs

Design Philosophy

The TMP is based on a unique philosophy of nature, technology and community — NaTeCo.
The new terminal is inspired by the beauty, tech renaissance and people of the Pittsburgh region to be iconic, practical and flexible as technological and transportation needs change.

Program Timeline

Master Plan Initiated	TMP Approval	Program Initiation & Controls	Design	Securing Financing	Construction	Opening
2013-2017	Sept 12, 2017	2017-2018	2018-2020	Early 2020	2019-2023	2023

PITTSBURGH INTERNATIONAL AIRPORT

PIT TRANSFORMED
TERMINAL MODERNIZATION PROGRAM

Benefits for Passengers

• Separate levels for arrivals and departures
• Shorter walking distances & security wait times
• Advanced technology and automated systems
• Additional space for concessions, artwork and amenities
• Emphasis on sustainability
• Green plazas and gathering spaces
• An abundance of natural light

Benefits for the Region

• More economic opportunity and jobs
• 11,000 direct & indirect jobs
• Increased non-airline revenue and real estate opportunities
• Enhanced, more efficient passenger experience
• Lower operating and maintenance costs
• No use of local tax dollars
